DENTURE/PARTIAL CARE INSTRUCTIONS

Take your dentures out daily and scrub them with dial pump soap.
Dial soap is mild and not abrasive on the denture teeth. Abrasive soap could cause scratches to the denture.

We will see you for several adjustments, to get you comfortable.
6 weeks of adjustments are included at no additional cost.

Leave your denture(s) out overnight if possible.
It's good to give your tissues a break

Keep your dentures moist when not wearing them.
Fill your denture container with water to soak. Be sure to clean your dentures thoroughly before soaking.

Adhesive

(USE ONLY IF NEEDED)

Use 3 dots the size of a pea, that is all you should need.
one on each side & one in the middle.

CAUTION

DO NOT soak or clean your denture(s) with anything that does not
say "dentures" on the packaging. Except for dial pump soap.
This could cause damage to your denture(s).

If you have any questions please feel free to contact our office.
